AI Film Rights & Distribution

RIGHTS PACKAGE

Neon Dreams

Comprehensive legal documentation and provenance record for AI-generated content licensing.

CATALOG ID SI8-2026-0001	FILMMAKER Alex Chen
RUNTIME 90 seconds	PRODUCTION DATE January 2026
PACKAGE VERSION v1.0	PACKAGE DATE February 18, 2026

This Rights Package is a factual documentation of production provenance, tool usage, and authorization status. It is provided for informational purposes and does not constitute legal advice or a legal warranty.

Executive Summary

This Rights Package provides comprehensive legal documentation for **Neon Dreams** (SI8-2026-0001), a 90-second AI-generated cyberpunk commercial/short. This summary highlights key risk factors and licensing eligibility at a glance.

🎬 Tool Provenance

- **Runway Gen-3 Alpha Turbo** (video)
- **ElevenLabs** (voice + sound effects)
- **Adobe Premiere Pro** (editing)

All tools used under paid commercial plans with receipts on file.

📋 No-List Compliance

✓ No celebrity likeness or real person faces

✓ No voice cloning of real people

✓ No copyrighted character imitation

✓ No brand IP imitation

✓ No political/deceptive content

✅ Rights Verified Status

Status: ✓ APPROVED

Risk Tier: STANDARD

Review Date: February 18, 2026

🔧 Tier 2 Eligibility

Modification Rights: ✓ AUTHORIZED

Tier 2 Product Placement: Available

Brand elements can be regenerated into neon signage and holographic ads (up to 30% screen time).

📊 Human Authorship Evidence

- **47 prompts** written by filmmaker across 8 scenes
- **180 video clips** generated; **23 selected** for final edit
- **42 minutes** of iterative editing and color grading
- **Documented creative control:** Shot selection, pacing, narrative flow, color palette

⚖️ What This Package Provides

✓ Included:

- Tool provenance documentation
- Commercial use authorization proof
- Human authorship evidence
- No-List compliance verification
- Modification rights status

✗ Not Included:

- Legal advice or legal warranty
- E&O insurance or indemnification
- Training data audit or verification
- Platform approval guarantee

> **Buyer Recommendation:** This package provides factual documentation for legal review. Buyers should conduct standard legal review appropriate to their use case, risk tolerance, and jurisdiction. For high-profile campaigns, recommend legal counsel review of tool ToS and training data policies.

Full 9-field Chain of Title documentation follows →

1. Tool Provenance Log

Tool / Service	Version / Model	Plan Type	Production Period	Receipt Status
Runway ML	Gen-3 Alpha Turbo	Standard Plan ($12/mo)	Jan 20-28, 2026	✓ ON FILE
ElevenLabs	Voice Design + Sound Effects	Creator Plan ($22/mo)	Jan 25, 2026	✓ ON FILE
Adobe Premiere Pro	CC 2024	Creative Cloud Subscription	Jan 28-29, 2026	✓ ON FILE

Primary Generation Tool: Runway Gen-3 Alpha Turbo

Supporting Tools: ElevenLabs (audio), Adobe Premiere Pro (post-production editing)

Tool Usage Summary:

- 47 prompts written by filmmaker across 8 scenes
- 180 video clips generated; 23 selected for final edit
- Human editorial control at prompt, selection, and post-production stages

---

2. Model Disclosure

AI Models Used:

- **Runway:** Gen-3 Alpha Turbo (video generation model active January 2026)
- **ElevenLabs:** Voice Design text-to-speech model + sound effects generation

Training Data Transparency:

- **Runway Gen-3:** Tool provider states in its published materials (Runway's public model card, as of Jan 2026) that Gen-3 was trained on licensed stock footage, public domain content, and proprietary datasets
- **ElevenLabs:** Tool provider states that voice models are trained on licensed voice datasets with consent; filmmaker confirms no unauthorized voice cloning used in this production

Note: SI8 does not independently audit training datasets. Training data transparency is based on tool provider public documentation and filmmaker attestation.

Tool Provider Terms Acknowledgment:

- All tools used under paid commercial plans with documented commercial use authorization
- Terms of Service reviewed February 15, 2026
- No tools flagged as high-risk or prohibited under SI8 Safe Lane criteria

---

3. Safe Lane Sign-off

Safe Lane Status: ✓ APPROVED FOR CATALOG

Risk Tier Assigned: STANDARD

Reviewer: SI8 Review Team | **Review Date:** February 17, 2026 | **Duration:** 73 minutes

Review Summary:

"Neon Dreams" passed Safe Lane review with no flags or conditions. The work demonstrates clear human creative direction (47 prompts, extensive iteration documented, editorial choices in post-production). All AI tools used under paid commercial plans. No copyrighted IP, real person likeness, or brand imitation detected. Audio is entirely AI-generated under authorized commercial use terms. Content is brand-safe for mainstream commercial attachment.

Notable Strengths:

- Exceptional documentation of human authorship (287-word declaration with specific creative decisions)
- Production process screenshots provide clear chain of custody
- Modification authorization covers holographic ad placements (strong Tier 2 potential)
- Visual style is distinctive and ownable (no derivative character imitation)

No List Compliance:

✓ No celebrity likeness or real person faces without consent

✓ No voice cloning of real people

✓ No copyrighted character imitation (e.g., recognizable IP)

✓ No brand IP imitation (all signage fictional/AI-generated)

✓ No political persuasion content

- ✓ No deceptive or deepfake content
- ✓ No adult/explicit content

Risk Tier Rationale:

Assigned **Standard** tier (not Certified) because primary generation tool is Runway Gen-3 (paid commercial plan), not Adobe Firefly. Standard tier reflects current best-practice AI tools (Runway, Pika, Sora) used under documented commercial authorization. Work is suitable for mainstream brand licensing with appropriate legal review by buyer's counsel.

---

4. Commercial Use Authorization

Tool TOS Verification:

Tool	Plan Type	Commercial Use Permitted	Verification Date
Runway Gen-3	Standard Plan ($12/mo)	✓ YES — Standard Plan includes commercial use rights	Feb 15, 2026
ElevenLabs	Creator Plan ($22/mo)	✓ YES — Creator Plan authorizes commercial audio use	Feb 15, 2026
Adobe Premiere	Creative Cloud	✓ YES — All CC content created by user is commercially usable	Feb 15, 2026

Plan Receipts: On file with SI8 (January 2026 billing statements for all paid services)

License Compliance: All tools used within authorized commercial use terms as of production date (January 2026)

Attribution Requirements: None (no attribution required by tool ToS for commercial projects)

Future ToS Monitoring: SI8 monitors tool ToS changes quarterly. Updated Rights Packages may be issued if terms materially change affecting commercial use authorization.

---

5. Modification Rights Status

Status: ✓ AUTHORIZED — FULL WORK

> Filmmaker Alex Chen has authorized SI8 to commission AI-regenerated brand-integrated versions of "Neon Dreams" for commercial product placement purposes. Authorization signed February 10, 2026 under SI8 Filmmaker Shopping Agreement.

Modification Authorization Details:

- **Authorized scenes:** All scenes (full work)
- **Brand integration points:** Neon signage, holographic advertisements, background digital billboards
- **Technical approach:** AI regeneration of specific visual elements (signage, holograms) while preserving character, narrative, and core aesthetic
- **Character integrity:** Character appearance and movement remain unchanged
- **Filmmaker approval:** Filmmaker requests review of brand-integrated versions before buyer delivery (approval not to be unreasonably withheld)

Tier 2 Eligibility:

✓ YES — FULL WORK

This work is eligible for Tier 2 product placement offerings. Brands can license custom AI-regenerated versions with brand elements integrated into neon signage and holographic ad placements.

Filmmaker Approval Process:

1. SI8 commissions AI regeneration with brand elements
2. Filmmaker reviews integrated version (48-hour review window)
3. Filmmaker provides approval or requests reasonable adjustments
4. Final version delivered to buyer

---

6. Category Conflict Log

Brand Categories - ELIGIBLE (All mainstream categories approved):

- Technology & consumer electronics
- Automotive
- Fashion & apparel
- Entertainment & streaming platforms
- Financial services
- Travel & hospitality
- Food & beverage (non-alcoholic)

- Health & wellness (non-pharmaceutical)

Brand Categories - RESTRICTED:

❌ Alcohol brands (filmmaker preference: maintain brand-safe positioning)

❌ Tobacco & vaping (legal restrictions + brand safety)

❌ Political campaigns or advocacy groups (SI8 No List policy)

❌ Gambling & sports betting (legal complexity + brand safety)

❌ Pharmaceutical products (regulatory disclosure requirements)

Exclusivity Status:

- **Current:** None (available for licensing)
- **Preference:** Category-exclusive for product placement deals (if tech brand licenses Tier 2 placement, no competing tech brand in same version)
- **Territory:** Global (no geographic restrictions)

Active Restrictions: None (no existing licenses or conflicts as of Feb 18, 2026)

---

7. Territory Log

Geographic Licensing: ✓ GLOBAL (NO RESTRICTIONS)

Territories - Authorized:

- Worldwide / All territories
- No geographic restrictions on licensing

Territories - Restricted:

None

Cultural Considerations:

- Content is culturally neutral (abstract sci-fi aesthetic)
- No culturally specific references that would limit geographic appeal
- Fictional signage uses abstract symbols (no real language)

Language Versions:

- Original version is dialogue-free (ambient audio only)
- Voiceover can be added in any language without re-production
- Subtitle-friendly (no on-screen text requiring translation)

Platform Compatibility:

- Suitable for global streaming platforms
- Suitable for airline/in-flight entertainment
- Suitable for retail/ambient display use

---

8. Regeneration Rights Status

AI Regeneration Authorized: ✓ YES — SCENE-LEVEL

Filmmaker has authorized AI regeneration of specific visual elements for brand integration while preserving core creative vision.

Authorized Regeneration Elements:

1. **Neon signage** (building facades, storefronts) — can be replaced with brand logos, taglines, product imagery
2. **Holographic advertisements** (floating mid-air ads in cityscape) — can be replaced with brand 3D holograms, product demos
3. **Digital billboards** (background screens, ambient displays) — can be replaced with brand video content, messaging

Protected Elements (NOT authorized for regeneration):

- Character appearance, wardrobe, movement
- Core camera movements and framing
- Rain effects and atmospheric lighting
- Color grading and overall aesthetic tone
- Scene structure and pacing

Brand Integration Authorization:

Brands can license Tier 2 product placement with brand elements AI-regenerated into authorized signage and holographic ad placements. Integration preserves filmmaker's creative vision while allowing brand

visibility.

Technical Parameters:

- Regenerated elements must maintain visual coherence with cyberpunk aesthetic (neon color palette, atmospheric lighting)
- Brand integration must not overwhelm core narrative or character moments
- Maximum 30% of screen time can show brand elements in any given scene

Filmmaker Review Required: ✓ YES (48-hour approval window for brand-integrated versions)

---

9. Version History

Version	Date	Event	Reviewer / Party	Notes
v1.0	Jan 28, 2026	Initial production complete	Alex Chen (filmmaker)	Original 90-second edit finalized
v1.0	Feb 10, 2026	Filmmaker Shopping Agreement signed	Alex Chen + SI8	Modification rights authorized; representation begins
v1.0	Feb 15, 2026	Submission to SI8 for Safe Lane review	Alex Chen	Complete documentation package submitted
v1.0	Feb 17, 2026	Safe Lane review complete	SI8 Review Team	APPROVED — Standard tier; catalog ID assigned: SI8-2026-0001
v1.0	Feb 18, 2026	Rights Package v1.0 issued	SI8 Operations	This document; catalog entry active

Re-review Triggers:

The following events would trigger a Safe Lane re-review and potential Rights Package update:

- Runway or ElevenLabs ToS changes affecting commercial use authorization
- Major platform policy updates (e.g., YouTube, Netflix AI content requirements)
- Licensing dispute or third-party claim related to this work
- Material modification to content (e.g., significant re-edit, new scenes added)
- Tool provider training data lawsuit affecting Gen-3 model

Version Update Policy:

- Minor updates (TOS monitoring, clarifications): Rights Package version increments to v1.1, v1.2, etc.
- Major updates (content changes, re-review required): New Rights Package issued as v2.0

Supporting Documentation (On File with SI8)

- ✓ Filmmaker Shopping Agreement (signed Feb 10, 2026)
- ✓ Runway Standard Plan receipt (January 2026)
- ✓ ElevenLabs Creator Plan receipt (January 2026)
- ✓ Adobe Creative Cloud receipt (January 2026)
- ✓ Human Authorship Declaration (287 words, signed)
- ✓ Production process screenshots (12 images: prompt examples, iterations, Premiere timeline)
- ✓ Safe Lane review checklist (completed Feb 17, 2026)
- ✓ No List compliance verification (completed)

Available Upon Request (for qualified buyers under NDA):

- Full prompt log (47 prompts with iteration notes and rationale)
- Runway generation history (180 clips with selection criteria documented)
- Adobe Premiere Pro project file
- Filmmaker portfolio and prior work samples

Usage Notes

Recommended Use Cases:

- **Tech brand commercials** — Perfect for consumer electronics, software, mobile devices
- **Automotive advertising** — Futuristic/electric vehicle positioning
- **Streaming platform content** — Ambient/background content, sci-fi category
- **Retail/experiential** — In-store displays, trade show content, ambient loops
- **Fashion & apparel** — Urban/streetwear brands, futuristic product launches
- **Editorial** — Stock footage for sci-fi/tech articles, video essays

Tier 1 Licensing (As-Is):

License the work as-is for use in commercials, content libraries, editorial, or ambient display. No brand integration, no modifications.

Tier 2 Product Placement (Custom Brand Integration):

Commission AI-regenerated version with your brand's logos, products, or messaging integrated into neon signage and holographic ad placements. Filmmaker approval process included. Category-exclusive available.

Buyer Guidance:

- Content is brand-safe for mainstream commercial use
- No material risk indicators identified under SI8 Rights Verified review criteria (reflects internal risk assessment as of review date; this is not a legal determination)
- Buyers should conduct standard legal review appropriate to their risk tolerance and use case
- For high-profile campaigns, recommend legal counsel review of tool ToS and training data policies
- For broadcast/streaming, verify platform AI content policies (requirements evolving 2026)

Attribution:

- No filmmaker attribution required for licensing use
- SI8 recommends crediting filmmaker for goodwill and future collaboration opportunities
- Suggested credit: "Directed by Alex Chen"

Risk Mitigation Summary (For Buyer Legal Counsel)

What This Rights Package Provides:

1. **Documented provenance:** Complete chain of custody from AI generation to final delivery
2. **Commercial use authorization:** All tools used under paid plans permitting commercial licensing
3. **Human authorship evidence:** Detailed declaration of creative direction and editorial control
4. **IP clearance:** No copyrighted characters, brand imitation, or unauthorized likeness use
5. **Safe Lane vetting:** SI8 review against brand safety and legal risk criteria
6. **Modification rights:** Authorized AI regeneration scope for product placement (Tier 2)
7. **Version tracking:** Audit trail for future TOS monitoring and re-review triggers

What This Rights Package Does NOT Provide:

- Legal warranty or indemnification (SI8 is not a law firm)

- Guarantee against future tool provider ToS changes
- Protection against evolving AI content regulations
- E&O insurance coverage (buyers should maintain own E&O policies)

Buyer Risk Assessment Framework:

- **Low-risk use cases:** Editorial, internal presentations, low-visibility content
- **Medium-risk use cases:** Organic social media, streaming platform content, regional campaigns
- **Higher-risk use cases:** National broadcast, high-profile brand campaigns (recommend legal counsel review)

Recommended Buyer Actions:

1. Review this Rights Package with in-house or external legal counsel
2. Assess risk tolerance based on use case, budget, and visibility
3. For broadcast/streaming, verify platform AI content policies as of license date
4. For high-profile campaigns, consider legal opinion on tool ToS and training data exposure
5. Maintain E&O insurance appropriate to campaign scale
