

COMMERCIAL ASSURANCE ASSESSMENT

Cloud World: Pan from Baby to Auntie Guard

ASSESSMENT ID	ASSESS-005-2026-07-12
REPORT DATE	12 July 2026
SUBMITTED BY	JDC_Media
SUBMISSION ID	SUB-A6A41B32

OVERALL ASSESSMENT OUTCOME

Evidence Supports Intended Commercial Use

COMMERCIAL CONFIDENCE

● HIGH

Section 1: Commercial Assurance Summary

This section is designed for the commercial decision-maker: the brand legal team, executive producer, E&O underwriter, or procurement lead.

Overall Assessment

Outcome: Evidence Supports Intended Commercial Use

This video passes the commercial use viability test and has the correct documentation.

Commercial Confidence

● HIGH

High	Core commercial evidence verified. Identified gaps are low commercial impact or addressable.
Medium	Material evidence verified but gaps present. Deployment should proceed with awareness of documented conditions.
Low	Core commercial evidence incomplete or inconsistent. Material gaps affect the reliability of the assessment.

Evidence Coverage Overview

Domain	Status	Commercial Impact of Any Gap
Identity & Accountability	Verified	None identified
Commercial Rights & Licensing	Verified	None identified
Human Creative Contribution	Partially Verified	None identified
Third-Party IP	Verified	None identified
Likeness & Performer Rights	Verified	None identified
Technical Provenance	Not Provided	None identified
Documentation Integrity	Verified	None identified

Key Findings

- 1. Identity & Accountability:** Submitter identity and project accountability were adequately established through the completed CertForm submission and signed Evidence Custodian Declaration.

Recommended Next Steps

1. **Human Contribution:** No workflow documentation beyond authorship statement — no prompt history export, no generation session screenshots, no iteration record.
2. **Technical Provenance:** Without prompt records, the creative provenance chain cannot be independently corroborated. For buyers requiring full documentation chains, this weakens the evidentiary weight of the provenance record.

Section 2: Assessment Scope

Content assessed: “Cloud World: Pan from Baby to Auntie Guard” — submitted by JDC_Media. Intended use: Agency deliverable. Territory: Global.

Evidence reviewed:

- It’s important to show the the submitter is the right person
- CertForm submission and production declarations
- Evidence Custodian Declaration
- Submitted video content (independent observation)

Assessment conducted by: PMF Strategy Inc. d/b/a SuperImmersive 8 (“SI8”), Taipei, Taiwan.

Assessment date: 12 July 2026

Methodology: SI8 Reviewer Workbook v0.1 | SI8 Reviewer Manual v0.1

FINDING

Depends on region.

COMMERCIAL IMPLICATION

Depends on region.

D — Documentation Integrity**✓ Verified****EVIDENCE REVIEWED**

These are consistent

FINDING

Evidence reviewed supports this domain. No material concerns identified during independent review.

COMMERCIAL IMPLICATION

No commercial concerns identified in this domain.

Section 4: Standard Assurance Language

This is controlled policy language reproduced verbatim in every SI8 Commercial Assurance Assessment Report. It may only be revised through a formal SI8 Methodology revision — not customized per assessment or per client.

This report is prepared by PMF Strategy Inc. d/b/a SuperImmersive 8 (“SI8”) and constitutes a commercial clearance assessment based on the evidence provided by the submitting party at the time of submission.

This report is not legal advice. SI8 is not a law firm and does not provide legal opinions. Nothing in this report should be construed as legal advice, a legal opinion, or a guarantee of any kind regarding the intellectual property status, copyright ownership, or legal clearance of the assessed content.

This assessment is evidence-based, not exhaustive. SI8’s assessment reflects the evidence reviewed. SI8 has not conducted independent title searches, chain of copyright investigations, or registrations with any government body. Findings are based on the evidence provided by the submitting party and SI8’s direct review of the submitted content.

Incomplete submissions affect confidence. Where evidence was not provided, SI8 has documented the gap and its potential commercial impact. Absence of identified evidence gaps does not mean absence of risk — it means the submitted evidence did not surface identifiable risks within the scope of this review.

This assessment reflects conditions at time of submission. Subsequent changes to applicable law, AI tool licensing terms, platform policies, third-party rights assertions, or the content itself may affect the commercial confidence assessment. SI8 assumes no obligation to update this report following delivery.

Submitter responsibility. The submitting party is responsible for the accuracy and completeness of the information provided in the submission. SI8 relies on submitter representations and does not independently verify all claims. False or materially incomplete submissions void this assessment.

Scope limitations apply. This assessment covers the content and evidence as submitted. It does not cover: subsequent edits or derivative versions, distribution channels not stated in the submission, jurisdictions not identified in the submission scope, or rights not associated with the submitted content.

Appendix A: Chain of Title

Chain of Title documentation for “Cloud World: Pan from Baby to Auntie Guard” as disclosed by the submitter and reviewed by SI8.

Field	Detail
Assessment ID	ASSESS-005-2026-07-12
